

## Polismart® iOS and Android App

Mobile app for real-time radiation monitoring.

The **Polismart®** App is a mobile application designed to work with Polimaster's radiation detection devices. It makes it easy to monitor and analyze radiation levels in real-time right from your smartphone.

With the Polismart® App, you can make the most of your Polimaster radiation detection equipment. It's perfect for use in workplaces, industrial settings, or fieldwork, helping you maintain high safety standards.

### Key features

- **Real-Time Monitoring**

Displays real-time radiation readings from connected Polimaster devices.

- **Data Logging**

Records and stores radiation data for later analysis.

- **Alerts and Notifications**

Provides alerts for high radiation levels or other critical conditions.

- **Geolocation Tracking**

Maps radiation levels to specific locations, useful for tracking radiation exposure over an area.

- **Device Management**

Allows users to configure and manage their Polimaster devices through the app.

**Compatible devices**

RadFlash® Electronic Personal Dosimeter

PM1703MA-II/BT Personal Radiation Detector

PM1703MO-II BT Personal Radiation Detector/Dosimeter

PM1703GNA-II/BT Personal Radiation Detector

PM1703GNA-II MBT Personal Radiation Detector/Dosimeter

PM1605BT Personal Radiation Monitor/Dosimeter

PoliPack® G Backpack Radiation Detector

PoliPack® G-S Backpack Radiation Detector

PoliPack® GN Backpack Radiation Detector

PoliPack® GN-S Backpack Radiation Detector
